Technical Skills

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Redux, Context API, MUI, ShadCn

Backend: Node.js, Express.js, REST, WebSocket, GraphQL, MVC

Database: MongoDB, SuperBase

DevOps: AWS EC2, S3

Tools: Nx Monorepo, Git, GitHub, Stripe, RazorPay, NodeMailer, SendGrid, npm, Yarn, pnpm, Postman

Auth: JWT, OAuth, Session Auth

Work Experience

Metaverse Ventures Pvt. Ltd.

Aug 2025 – Present

Software Engineer – Full-Stack

Remote

- Owned **end-to-end delivery** of 10+ **production-grade products**, independently leading 4+ **projects** from product research to deployment.
- Drove **product architecture, system design, and execution**, translating ambiguous requirements into scalable systems across Web2 + Web3.
- Built and scaled a **cross-chain payments & treasury platform** (Swap, Bridge, Yield, Pay-in/Pay-out) handling multi-chain transactions and fund flows.
- Led **integration strategy** for external APIs (Bridge, Swap, Yield, On/Off-ramps), ensuring reliable execution and unified transaction flows.
- Designed **real-time, event-driven systems** with secure wallet/auth flows and automated transaction lifecycle management.
- Improved system performance and execution latency by **40–50%** through optimized routing, caching, and infra decisions.
- Built modular **user-facing dashboards** and internal tools for monitoring, control, and treasury operations.

Amenses Innovation Pvt Ltd

July 2024 – Aug 2025

Associate Software Developer

Indore, India

- Delivered **5+ client projects** across international and domestic clients, handling end-to-end development in a service-based environment.
- Led development of **2 projects as Lead Developer**, driving architecture, task distribution, and delivery with cross-functional teams.
- Collaborated directly with clients to gather requirements, iterate on feedback, and ensure timely, high-quality releases.
- Owned **end-to-end product lifecycle** from requirement analysis to deployment, ensuring scalable and maintainable systems.
- Improved system performance and cost efficiency through optimized backend design, caching strategies, and cloud deployment decisions.
- Built reusable systems and internal tooling to accelerate development and maintain consistency across multiple projects.

Amenses Innovation Pvt Ltd

March 2024 – July 2024

Software Developer Intern

Indore, India

- Completed 2+ MERN full-stack products individually + collaboratively.
- Led sprint planning + code reviews + Git-based workflows.
- Integrated **NodeMailer** + **SendGrid** automating 2K+ password + verification flows monthly.
- Designed backend using clean MVC + service pattern reducing redundancy 40%.

Education

Chameli Devi Group of Institutions	Aug 2021 – Jun 2025
<i>B.Tech in Computer Science, CGPA: 7.49</i>	<i>Indore, India</i>
Indian Public Higher Secondary School	2019
<i>Class 12th – 79.6%</i>	<i>M.P., India</i>
Indian Public Higher Secondary School	2017
<i>Class 10th – 82.4%</i>	<i>M.P., India</i>

Projects

StablecoinPay (Payment Infrastructure) Next.js, TypeScript, Node.js, Web3, MongoDB, AWS Live	2025
* Engineered end-to-end stablecoin payment infrastructure integrating Bridge APIs for wallets, virtual accounts, card rails, and cross-border transfers. * Built transaction orchestration layer handling swaps, on/off-ramp flows, and external transfers with retry logic and failure recovery. * Designed scalable backend systems for concurrent transaction processing with secure signing and real-time settlement tracking.	
Stables (Link-Based Payment System) Next.js, TypeScript, Node.js, Web3 Live	2025
* Developed link-based payment platform enabling shareable payment URLs for single and split invoice transactions. * Integrated embedded wallets and swap flows, abstracting blockchain complexity into a seamless user-facing experience. * Implemented real-time payment tracking and payout distribution for multi-user financial workflows.	
Ubuntu Interior Next.js, TypeScript, Node.js, MongoDB, AWS	2024-25
* Built scalable monorepo multi-package structure for e-commerce platform. * Integrated S3 media upload + optimized transactions for bulk orders.	
Web3 & DeFi Platform Contributions Node.js, Next.js, Web3	2025
* Contributed to multiple Web3 platforms including DAO systems, intent-based trading protocols, and DeFi infrastructure projects. * Worked on feature development, API integrations, and performance improvements across platforms such as AdventureDAO, IntentSwap, ModernMoney, and MetaSub. * Gained experience in decentralized systems design, trading workflows, and blockchain-based financial primitives.	

Awards

- Winner – Code Hunter 2024
- 3rd Place – Web Dev Hackathon 2024
